

Proceeding 02-278

I was very shocked to hear that lowering the restriction proceedings, "02-278". The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law has improved our time at home, by not receiving soliciations and non-wanted telephone calls. After all, we are paying for the telephone service and should be able to select who, or whom we have call OUR telephone number. "I received many calls per week. I never counted how many, but at least fifteen or twenty per week. I only receive one, if that since I put our name on the "Do Not Call List". We Do Not want these calls, and insist you do what the American Free People want.

Sincerely;  
Mr. And Mrs. John C. Arnt
